## **SEALANT**

A sealant is a thin, plastic coating applied to the chewing surface of molars, pre-molars and any deep grooves of teeth. More than 75% of dental decay begins in these deep grooves. Teeth with these conditions are hard to clean and are very susceptible to decay. A sealant protects the tooth by sealing grooves, creating a smooth surface that is easier to clean. Sealants can protect teeth from decay for many years, however they are not permanent and must be checked for wear and chipping during regular dental appointments.

### **Things to expect after treatment:**

- Avoid chewing anything hard such as ice, candies, etc. This will wear sealants out and cause them to fall out.
- Your bite may appear off at first, this sensation will naturally go away within a couple of days.

Keep in mind that sealants alone will not prevent tooth decay! It is important to brush at least twice a day, floss daily, eat a balanced diet, and maintain regular visits to the dentist.

## WARRANTY INFORMATION

At Artistic Works Dentistry we are confident in our work, which is why we provide our patients with a warranty on all our dental services. We guarantee our work for 3-5 years, depending on the service. The warranty begins on the date that treatment was rendered. In order to remain eligible for a warranty, it is the patient's responsibility to maintain all recommended hygiene appointments. In the event that the patient is unable to maintain appointments or the patient fails to reschedule an appointment at least 2 business days prior to, the warranty is forfeited. Warranty does not cover tooth alterations as a result of forceful impact.

*Our mission is 'To assist others in achieving optimal dental health by providing high quality services that proved long term oral health'.*
